

## St. Louis of France STEM Academy

13901 E. Temple Avenue, La Puente, CA 91746

Phone: (626) 918-6210

Website: [www.slfschool.org](http://www.slfschool.org)

### COVID-19 Exposure Management Plan Guidance in TK-12 Schools: Appendix T2 Updated - January 4, 2022

#### Recent Updates: (Changes highlighted in yellow)

1/4/2021:

- Added Over-the-Counter tests as an acceptable option for school screening testing programs that are not under the State Health Officer Order.

12/31/2021:

- Updated quarantine, testing, and masking guidance for persons exposed to COVID-19 in TK-12 schools to align with new CDC and California Department of Public Health isolation and quarantine guidance for the general public.
- Added a requirement for close contacts who are exempt from quarantine to test on Day 5 after the last exposure date, in order to remain in school.
- Clarified that exposed students under modified quarantine at school must continue to monitor their health and mask at all times (indoors, outdoors, and on school buses) for 10 days from the date of last exposure, even if released from quarantine after a negative test on Day 5.

A targeted public health response to contain COVID-19 exposures at a community level can help maximize the impact of the Los Angeles County Department of Public Health (DPH) COVID-19 response.

St. Louis of France School serving students from Transitional Kindergarten through Grade 8 is a trusted community partner that can help DPH improve the timeliness and impact of the Public Health response through rapid initiation of a COVID-19 Exposure Management Plan (EMP). Immediate implementation of an EMP when a single case of COVID-19 is identified at school can accelerate the ability to contain the spread of infection and prevent outbreaks from occurring.

The steps for managing exposures to 1, 2, 3 or more COVID-19 cases at St. Louis of France School are described below and summarized in Appendix A.

#### Exposure Management Planning Prior to Identifying 1 COVID-19 Case at St. Louis of France School

**REQUIRED:** Lorraine Ovalle, Principal, is the designated School COVID-19 Compliance Officer. She is responsible for establishing and enforcing all COVID-19 safety protocols and ensuring that staff and students receive education about COVID-19. She serves as a liaison to DPH for sharing site-level information to facilitate public health action.

**REQUIRED:** Seating charts in classrooms and participant rosters for students and staff participating in school extracurricular programs to facilitate identification of close contacts of persons with COVID-19 at the school.

**REQUIRED:** All students and employees who (1) have symptoms consistent with COVID-19, (2) are quarantined because of exposures at school, or (3) are at school with an active public health investigation shall have access to testing or be tested for COVID-19.

**REQUIRED:** We will report all known COVID-19 hospitalizations and/or deaths among students or staff to DPH by sending a notification to [ACDC-Education@ ph.lacounty.gov](mailto:ACDC-Education@ph.lacounty.gov).

**RECOMMENDED:** St. Louis of France school is implementing an asymptomatic screening testing program. Staff and students that are not fully vaccinated are prioritized for regular testing as an important part of identifying infections early to prevent transmission on campus. **Based on the current level of community transmission, fully vaccinated individuals may be considered for asymptomatic screening testing programs if there is sufficient testing capacity.** School screening testing programs should use an FDA-authorized viral COVID-19 test, including a Nucleic Acid Amplification Test (NAAT, such as PCR) or an Antigen test, that is collected and performed in a healthcare setting or certified testing site. An FDA-authorized Over-the-Counter test is acceptable for use in COVID-19 school screening testing programs. Note, unverified Over-the-Counter test results cannot be used to fulfill required testing for school employees under the [California State Health Officer Order](#).

**RECOMMENDED:** St. Louis of France School is implementing a DPH-guided symptom screening program prior to school entry or while at school. St. Louis of France will apply DPH guidance on Decision Pathways for persons who have not been tested yet for COVID-19 but screen positive for symptoms prior to school entry or while at school. Staff will submit an online report (Campus Screen app) before arrival at school. Students will be screened at home (using Campus Screen app) by parents before arrival at school. A thermometer is available to be used for temperature checks before students exit the vehicle at morning drop off. Thermometers will also be available in each classroom for teachers to conduct temperature checks.

## **Exposure Management for 1 COVID-19 Case at St. Louis of France School**

**REQUIRED:** After identifying 1 confirmed COVID-19 case (student or employee), the School Compliance Office instructs the case to follow Home Isolation Instructions for COVID-19 ([ph.lacounty.gov/covidisolation](http://ph.lacounty.gov/covidisolation)). NOTE: a confirmed COVID-19 case is an individual who has a positive COVID-19 test.

**REQUIRED:** School Compliance Officer provides a copy of the Public Health Emergency Isolation Order and informs the case that DPH will contact the case directly through the DPH Case and Contact Investigation Program to collect additional information and issue the Health Officer Order for Case Isolation.

**REQUIRED:** School Compliance Officer works to identify all individuals in the School who have had an exposure to the confirmed positive case during their infectious period (Close Contacts).

- A case is considered to be infectious from 2 days before their symptoms first appeared until the time they are no longer required to be isolated (i.e., no fever for at least 24 hours, without the use of medicine that reduce fevers AND other symptoms have improved AND at least 10 days have passed since symptoms first appeared). A person with a positive COVID-19 test but no symptoms is considered infectious from 2 days before their test was taken until 10 days after their test.
- Close Contact: A person is considered to have been exposed to a case during the infectious period if at least one of the following criteria is met:
  - Being within 6 feet of infected person for 15 minutes or more over a 24-hour period.

- Having had unprotected contact with the infected person's body fluids and/or secretions of a person with confirmed COVID-19 (e.g., being coughed or sneezed on, sharing utensils or saliva, or providing care without using protective equipment).
- Individuals in the classroom or school group should NOT be considered a close contact unless the program is reasonably sure that they meet the above definition of a close contact. Individuals should NOT be considered a close contact solely because they were in the same classroom or school group as a person with confirmed COVID-19. If the program cannot determine who is a close contact to a person with confirmed COVID-19 at school, they should contact Public Health immediately for technical assistance. For guidance specific to identification of close contacts in a Youth Sports program, please refer to the [Exposure Management Plan for Youth Recreational Sports Programs](#).

**REQUIRED:** School Compliance Officer shall notify DPH of (1) employees and students with confirmed COVID-19 who were on campus at any point within the 14 days prior to the illness onset date and (2) persons on campus who were exposed to the infected person during the infectious period. The illness onset date is the first date of COVID-19 symptoms or the COVID-19 test date, whichever is earlier.

- All school-associated COVID-19 cases and persons identified to have had an exposure to cases on campus should be reported online through the secure web application: <http://www.redcap.link/lacdph.educationsector.covidreport>. If online reporting is not possible, reporting can be done manually by downloading and completing the [COVID-19 Case and Contact Line List for the Education Sector](#) and sending it to [ACDC-Education@ph.lacounty.gov](mailto:ACDC-Education@ph.lacounty.gov). All case notifications should be submitted within 1 business day of being notified of the case.
- Schools that are reporting a school-associated COVID-19 case to DPH for the first time or need assistance on COVID-19 exposure management can call the TK-12 School COVID-19 Case Reporting Call Center, Monday through Friday from 8:00AM to 5:00PM. School administrators that do not have the Call Center number should contact [ACDC-Education@ph.lacounty.gov](mailto:ACDC-Education@ph.lacounty.gov) for the number.

**REQUIRED:** All persons identified to have had an exposure to a COVID-19 positive case at school are notified by the School Compliance Officer of the exposure through a letter or other communication strategies and a copy of the [Public Health Emergency Quarantine Order](#). A School Exposure Notification letter template is available at: [COVID-19 Template Notification Letters for Education Settings](#) (Template #1). The notification of exposure should include the following messages:

- DPH will coordinate with the school to contact persons who are identified as having had close contact with the school-associated case to gather additional information and provide guidance on testing and quarantine. [Requirements for close contacts who are not exempt from quarantine](#)
  - The following close contacts are required to quarantine:
    - Persons who are not fully vaccinated\*; OR
    - Persons who are fully vaccinated and booster-eligible but have NOT yet received their booster dose

\* Includes persons previously infected with SARS-CoV-2, including within the last 90 days
  - Close contacts who are required to quarantine must self-quarantine (stay in their home or another residence, separate from others) and monitor for symptoms as outlined in [Quarantine and Other Instructions for Close Contacts](#). As long as symptoms of COVID-19 are not present they may end quarantine either:

- After 10 full days have passed from their last known contact to the infectious case (as defined above). Activities may resume starting on Day 11 provided they are asymptomatic.
- After 5 full days have passed from their last known contact to the infectious case if they have a negative viral test result from a specimen collected on Day 5 from the date of last exposure to the case. Activities may resume starting on Day 6. The test must be an FDA-authorized viral COVID-19 test (e.g., NAAT or Antigen test); use of an FDA-authorized Over-the-Counter test is acceptable for testing out of quarantine. If the test is positive, follow Home Isolation Instructions for COVID-19 ([ph.lacounty.gov/covidisolation](https://ph.lacounty.gov/covidisolation)). Exposed persons who were previously infected with SARS-CoV-2 within the past 90 days should test using an Antigen test.
- Regardless of when quarantine ends, close contacts must continue to monitor their health and upgrade their masks for 10 days from the date of last exposure: adults should wear a surgical grade (also referred to as medical procedure) mask or higher level personal protective equipment (PPE) such as a KN95 or N95 respirator mask; children should wear a non-cloth mask of multiple layers of non-woven material with a nose wire. Masks must be worn at all times when around others both indoors and outdoors. Refer to the Los Angeles County Department of Public Health [COVID-19 Masks](#) page for latest guidance on masking. If symptoms develop, test using an FDA-authorized viral COVID-19 test and stay home. If the test is positive, follow Home Isolation Instructions for COVID-19 ([ph.lacounty.gov/covidisolation](https://ph.lacounty.gov/covidisolation)). Note: exposed persons who were previously infected with SARS-CoV-2 within the past 90 days should test with an Antigen test.
- Requirements for close contacts who are exempt from quarantine
  - The following close contacts are not required to quarantine provided they remain asymptomatic:
    - Persons who are boosted; OR
    - Persons who are [fully vaccinated](#) but not yet booster-eligible
  - In order to remain in school, close contacts who are exempt from quarantine are required to test. At a minimum, the test specimen must be collected on Day 5 after the date of last exposure. However twice a week testing is strongly recommended, with the first test specimen collected immediately after being notified of the exposure and the second test specimen collected on Day 5 after the date of last exposure. The test must be an FDA-authorized viral COVID-19 test (e.g., NAAT or Antigen test); use of an FDA-authorized Over-the-Counter test is acceptable for this testing requirement.
  - In addition, they must monitor for symptoms and upgrade their masks for 10 days from the date of last exposure: adults should wear a surgical grade (also referred to as medical procedure) mask or higher level PPE such as a KN95 or N95 respirator mask; children should wear a non-cloth mask of multiple layers of non-woven material with a nose wire. Masks must be worn at all times when around others both indoors and outdoors. Refer to the Los Angeles County Department of Public Health [COVID-19 Masks](#) page for latest guidance on masking. If symptoms develop, test using an FDA-authorized viral COVID-19 test and stay home. If the test is positive, follow Home Isolation Instructions for COVID-19 ([ph.lacounty.gov/covidisolation](https://ph.lacounty.gov/covidisolation)).
- Employees with a campus exposure should follow guidance outlined in Cal/OSHA COVID-19 Prevention [Emergency Temporary Standards \(ETS\)](#). However, if an employee's quarantine period ends before they meet [Cal/OSHA's criteria for return-to-work](#), they may return to the Worksite(s) as soon as they have cleared quarantine per the [Health Officer Quarantine Order](#). A summary of requirements is provided in the Public Health guidance document on [Responding to COVID-19 in the Workplace](#).

- Schools are required to have a plan to facilitate COVID-19 response testing for persons who have an exposure at school. Staff and students who are tested must inform the school of the test results. Testing resources include: School Testing Programs, Employee Health Services or Occupational Health Services, Student Health Center, Personal Healthcare Providers, LA City and County Testing Sites: [covid19.lacounty.gov/testing](https://covid19.lacounty.gov/testing), and [Community-Based Testing Sites](#) (local health centers and pharmacies). Individuals who need assistance finding a medical provider can call the LA County Information line 2-1-1, which is available 24/7.
- *Optional Modified Quarantine for TK-12 Students.* Modified quarantine allows asymptomatic students, under self-quarantine orders, who were exposed to a person with diagnosed COVID-19 in any school setting where students are supervised by school staff (indoors, outdoors, or on a school buses) to continue in-person academic activities that are part of the regular school curriculum and provided during school hours. As a reminder, persons who are fully vaccinated and/or have recovered from laboratory-confirmed COVID-19 within the last 90 days do NOT need to self-quarantine. An asymptomatic student under self-quarantine orders may be approved for modified quarantine if specific criteria outlined below are met. If these criteria cannot be met, then the exposed student must remain in [home quarantine](#) as outlined above.
  - 1) The exposure was to a person with a COVID-19 diagnosis in any school setting where students are supervised by school staff (indoors, outdoors, or on school buses).
  - 2) The exposed student remains asymptomatic.
  - 3) The exposed student AND the person with a COVID-19 diagnosis MUST have each worn a mask consistently and correctly during the entire exposure period. This includes any outdoor exposures. Prior to applying modified quarantine, verification is required of mask-to-mask exposure between the person with a COVID-19 diagnosis and the exposed student. School Administrators must keep records of this verification and provide it to Public Health upon request.
  - 4) The exposed student is not part of a TK-12 outbreak. Due to the high rate of secondary transmission in outbreaks, students with an outbreak exposure must fully quarantine at home. They may be released after Day 5, if they have a negative viral test result from a specimen collected on Day 5 from the date of last exposure to a confirmed COVID-19 case in the outbreak, provided they remain without symptoms. Note: in outbreak sites, the quarantine period may be extended by Public Health for additional days to help control transmission risk.
  - 5) Students under modified quarantine are still subject to the [Health Officer Quarantine Order](#) and must stay at home for the duration of quarantine, except for in-person instruction.
  - 6) Students under modified quarantine are required to wear a mask indoors and outdoors and on school buses, while at school. The exception is for eating and COVID-19 Exposure Management Plan in TK-12 Schools drinking, where they must be at least 6 feet away from other students and preferably outdoors.
  - 7) Students under modified quarantine must be tested twice a week using an FDA-authorized viral COVID-19 test (e.g., PCR or Antigen) in a healthcare setting or certified testing site or an FDA-authorized Over-the-Counter test. It is strongly recommended that the first test specimen be collected immediately after being notified of the exposure and the second test specimen be collected on Day 5 from the date of last exposure. Students may be released from quarantine after Day 5 from the date of last exposure if a test specimen is collected on Day 5, the test is negative, and the student remains without symptoms. Even if released from quarantine after Day 5, exposed students must continue to monitor their health and mask at all times (indoors, outdoors, and on school buses) for 10 days from date of

last exposure. If symptoms develop, the student should test using an FDA-authorized viral COVID-19 test and stay home. If the test is positive, follow Home Isolation Instructions for COVID-19 ([ph.lacounty.gov/covidisolation](http://ph.lacounty.gov/covidisolation)).

- 8) It is strongly recommended that unvaccinated, asymptomatic individuals who are NOT identified as close contacts but who were present in a school classroom or school activity with a confirmed case be tested weekly for two weeks (14 days) following the date of last exposure in the classroom/activity. If capacity allows, consider also testing asymptomatic, fully vaccinated individuals that were present in the school classroom/activity with a confirmed case but were not close contacts.

**RECOMMENDED:** School Compliance Officer will determine whether additional notification is needed to inform the wider school community about the school exposure and precautions being taken to prevent spread of COVID-19. A general notification letter template is available at: [COVID-19 Template Notification Letters for Education Settings \(Template #2\)](#).

### **Exposure Management for 2 COVID-19 Cases at St. Louis of France School within a 14-day Period**

**REQUIRED:** After identifying 2 confirmed cases (students and/or employees) within a 14-day period, the school follows the steps for 1 confirmed case.

**REQUIRED:** School Compliance Officer consults with Public Health to determine whether the 2 cases are epidemiologically linked, meaning that the two affected individuals were both present at some point in the same setting during the same time period while either or both were infectious. \* Schools should contact DPH for assistance in determining whether cases are epidemiologically linked by emailing [ACDC-Education@ph.lacounty.gov](mailto:ACDC-Education@ph.lacounty.gov) or by calling the TK-12 School COVID-19 Case Reporting Call Center.

*\*A case is considered to be infectious from 2 days before symptoms first appeared until they are no longer required to be isolated (i.e., no fever for at least 24 hours without the use of medicine that reduces fever AND other symptoms have improved AND at least 10 days have passed since symptoms first appeared). A person with a positive COVID-19 test but no symptoms is considered to be infectious from 2 days before their test was taken until 10 days after their test.*

Determination of epidemiological links between cases may require further investigation to assess exposure history and identify all possible locations and persons that may have been exposed to the case while infectious at the site. NOTE: Epidemiologically linked cases include persons with identifiable connections to each other such as sharing a physical space (e.g., in a classroom, school event, sports team, other extracurricular activities, school transportation, office site), indicating a higher likelihood of linked spread of disease in that setting rather than sporadic transmission from the broader community. If epidemiological links exist, DPH will advise the school on important steps to take and communications to students and employees on precautions to take to prevent further spread at the school, including implementation of site-specific interventions for infection control.

### **Exposure Management for 3 or more COVID-19 Cases at St. Louis of France School within a 14-day Period**

**REQUIRED:** If the school identifies a cluster of 3 or more confirmed cases within a 14-day period, the school should proceed with the following steps:

- Report the cluster immediately to DPH by calling the TK-12 School COVID-19 Case Reporting Call Center or by submitting a report online at: <http://www.redcap.link/lacdph.educationsector.covidreport>. If online reporting is not possible, reporting can be done manually by downloading and completing the [COVID-19 Case and Contact Line List for the Education Sector](#) and sending it to [ACDC-Education@ph.lacounty.gov](mailto:ACDC-Education@ph.lacounty.gov).
- DPH will review the submitted information to determine whether the outbreak criteria described below have been met and will notify the school within 1 business day on next steps.
- Outbreak Criteria: At least 3 confirmed cases of COVID-19 within a 14-day period of each other in a specified group\* with members who are epidemiologically linked, do not share a household, and are not a close contact of each other outside of the campus.  
\* Specified groups include persons that share a common membership at school (e.g., classroom, school event, sport teams, other school extracurricular activities, school transportation, office site). Epidemiological links require the infected persons to have been present at some point in the same setting during the same time period while infectious.
- NOTE: For overnight camps, a “household cohort” means cabinmates (campers and staff) who are staying together in a cabin, bunkhouse, or similar space. Additional guidance regarding overnight camps is located in the [Reopening Protocol for Overnight Organized/Children’s Camps: Appendix K-1](#).
  - If outbreak criteria are not met, DPH will advise the school to continue with routine exposure management.
  - If outbreak criteria are met, DPH will notify the school that an outbreak investigation has been activated and a public health investigator will communicate directly with the school to coordinate the outbreak response.

**Appendix A: Steps for Managing Exposures to COVID-19 Cases at School**

<b>1 Case</b>	<ol style="list-style-type: none"> <li>1) <i>Required:</i> School instructs the case to follow COVID-19 Home Isolation Instructions.</li> <li>2) <i>Required:</i> School informs the case that DPH will contact the case directly to collect additional information and issue Health Officer Order for Isolation.</li> <li>3) <i>Required:</i> School works with the case to identify school contacts.</li> <li>4) <i>Required:</i> School notifies* school contacts of exposure and instructs them to quarantine at home and test for COVID-19. NOTE: Asymptomatic persons who are <b>fully vaccinated AND have an exposure are recommended to test but are not required to quarantine. Asymptomatic persons who</b> have been diagnosed with COVID-19 within the last 90 days AND have an exposure are not required to quarantine or test for COVID-19.</li> <li>5) <i>Required:</i> School informs school contacts that DPH will contact them directly to collect additional information and issue Health Officer Order for Quarantine.</li> <li>6) <i>Required:</i> School submits a report to DPH within 1 business day with information on the confirmed case and persons who were exposed to the case at the site.</li> <li>7) <i>Recommended:</i> School sends general notification* to inform the school community of the school exposure and precautions taken to prevent spread.        *Templates for contact notification and general notification are available at: <a href="#">COVID-19 Template Notification Letters for Education Settings</a>.</li> </ol>
<b>2 Cases</b>	<ol style="list-style-type: none"> <li>1) <i>Required:</i> Follow required steps for 1 confirmed case.</li> <li>2) <i>Recommended:</i> If the 2 cases occurred within 14 days of each other, school works with DPH to determine whether the cases have epidemiological (epi) links. If epi links exist, school implements additional infection control measures.</li> </ol>
<b>3+ Cases</b>	<ol style="list-style-type: none"> <li>1) <i>Required:</i> If a cluster of 3 or more cases occurred within 14 days of each other, school immediately notifies DPH.</li> <li>2) <i>Required:</i> DPH determines if the outbreak criteria have been met. If outbreak criteria are met, a DPH outbreak investigation is activated, and a public health investigator will contact the school to coordinate the outbreak investigation.</li> </ol>
